A Guide to the Basics of Website Hosting

There are three basic choices for website hosting; 1) Shared Hosting, 2) VPS (Virtual Private Server Hosting) and 3) Dedicated Hosting. At Barak Hosting we offer all three in various levels of performance and specifications. Please visit <http://www.barakhosting.com/hosting.html>

Shared Servers

The majority of websites are hosted on what are commonly referred to as a Shared Server. This means that your website is on the same server as hundreds or even thousands of other websites – hence a Shared Server. For sites that are not too demanding in their needs for resources (RAM, processor speed, monthly transfer rates/bandwidth usage, high security, etc.) a Shared Server is all that is required. You'll benefit from lost costs and the only decisions to make is what level of Shared hosting your site requires. Entry level Shared Hosting provides for a limited number of files allowed, size of the hard drive available, the number of email accounts and other specification limits. More robust plans provide more capabilities and of course cost a little more each month.

Barak Hosting provides for your specific needs with a diverse choice of Shared Hosting Options http://www.barakhosting.com/shared_hosting.html

Personal Plan http://www.barakhosting.com/pers_plan.html

- 1) 500 MB storage
- 2) 250 GB of bandwidth per month
- 3) 5 email accounts
- 4) cPanel Control Panel

This is perfect for the beginner or the small site with very few needs. At 3.95 per month it's a price that can't be beat.

Shared SOHO Plan http://www.barakhosting.com/soho_plan.html

- 1) 5 GB storage
- 2) 500 GB of bandwidth per month
- 3) 15 email accounts
- 4) cPanel Control Panel
- 5) 10 MySQL databases

For the small user needing additional email accounts and database along with greater storage and bandwidth SOHO hosting is just right for you. At \$7.95 per month you are ready to grow your presence on the web.

Business Plan http://www.barakhosting.com/bus_plan.html

- 1) 10 GB storage
- 2) 1 TB (terabytes) of bandwidth per month
- 3) 50 email accounts
- 4) cPanel Control Panel
- 5) 15 MySQL databases
- 6) One FREE domain registration

Perfect for the rapidly growing business. Start a blog, add an online store and so much more. All this for only \$12.95 per month.

Executive Plan http://www.barakhosting.com/ent_plan.html

- 1) 15 GB storage
- 2) 2 TB (terabytes) of bandwidth per month
- 3) Unlimited email accounts
- 4) cPanel Control Panel
- 5) 25 MySQL databases
- 6) Three FREE domain registrations

The summit of Shared Hosting provides huge storage and bandwidth, unlimited email accounts and FREE domains.

VPS (Virtual Private Servers)

A Virtual Private Server (or commonly known as a Virtual Dedicated Server) is a high-end robust server partitioned into multiple servers (sections) having its own capabilities and dedicated specifications. Bridging the gap between low cost Shared Hosting and higher costing Dedicated Servers, VPSes provide for higher reliability at an affordable cost. Processor speed is still limited compared to a Dedicated Server but RAM memory is specific for each VPS section. Barak Hosting offers three levels of VPS Hosting <http://www.barakhosting.com/vps.html> to meet your specific needs. Whether a 20, 40 or 60 GB VPS starting at \$26.95 per month Barak Hosting has the VPS to meet your needs.

Dedicated Servers

A Dedicated Server is a server leased to you for the purpose of hosting one or more websites. Depending on your capabilities and available time Dedicated Servers are managed by yourself or have Managed Services programs for the administration of the server. Barak Hosting offers a broad range of Dedicated Servers to meet your needs. http://www.barakhosting.com/dedi_servers.html

From small Dedicated Servers running Single Core processors to dual-core and multi-hard drive options Barak Hosting has what you need in a Dedicated Server

Barak Hosting has offers Internet Marketing, Search Engine Optimization (SEO), Remote Backup Services and much more as valued services to our clients. Email sales@BarakHosting.com or call an Account Representative today at 888-399-9973 to see how Barak Hosting can assist you on the World Wide Web.
